

2

```
lines = []  
  
with open('text.txt') as f:  
    lines = f.readlines()  
  
for line in lines:  
    print(line.rstrip())  
#Mario  
#Yoshi  
#Toad
```

```
Mario  
Yoshi  
Toad
```

Load

Load a file

The file 'text.txt' is opened and each line is added into a list. The list is then iterated and each line is printed. The 'rstrip' removes the `\n` - this is the newline character.
