

2

```
output = ["Mario","Yoshi","Toad"]

with open('out.txt', 'a') as f:
    f.truncate(0)
    for o in output:
        f.write(o + "\n")
```

```
Mario
Yoshi
Toad
```

out.txt

Save

Save a file

The list 'output' is being saved to the file 'out.txt'. The file is opened in append mode, so content can be add on the existing file. In this case the file is deleted by the truncate(0). The \n add newlines at the end of each line.
