

# Shuffle the digits 0-9

Please Shuffle the digits below, complete the function that will take the list as an input, and return a shuffled list. You may write more than 1 function. Delete the word 'pass' and put your code there.

```
In [1]: def shuffle(digits):  
        pass
```

The code below the function will be sent to your function above and the print out the response.

```
In [2]: myList = [0,1,2,3,4,5,6,7,8,9]  
        print(shuffle(myList))
```
