

# 4

```
#List pop  
fruits = ['apple', 'banana', 'cherry']  
  
x = fruits.pop()  
print(x) #cherry  
print(fruits) #['apple', 'banana']  
  
fruits.pop(0) #removes apple  
print(fruits) #['banana']
```

## List pop

### Pop!

The list function pop will remove the last item from a list, the removed item is returned. Eg 'x' in the above example is the removed item.

Items can also be removed from a specific index. ie index 0 as above.
